A B
took the train instead of the bus.
C D

III. READING.

A. Read the passage carefully, then decide whether the following statements are true (T) or false (F).

THE POSTAGE STAMP

Before the invention of the postage stamp, it was difficult- to send a letter to another country. The sender paid for the letter to travel in his or her own country. Then the person in other country paid for that part of the trip. If the letter crossed several countries, the problem was worse.

Rowland Hill, a British teacher, had the idea of a postage stamp with glue on the back. The British post office made the first stamps in 1840. They were the Penny Black and the Twopence Blue. A person bought a stamp and put it on a letter. The post office delivered the letter. When people received letters, they didn't- have to pay anything. The letters were prepaid.

Postage stamps became popular in Great Britain immediately.

Other countries started making their own postage stamps very quickly.

There were still problems with -international mail. Some countries did not want to accept letters with stamps from another country. Finally, in 1874 a German organized the Universal Postal System. Each country in the UPS agree to accept letters with prepaid postage from the other members. Today the offices *of* the UPS are in Switzerland, almost every country in the world is a member of this organization. It takes care of any international mail problems.

Today post offices in the every country sell beautiful stamps. Collecting stamps is one of the most popular hobbies in the world, and every stamp collector knows about the Penny Black and the Twopence Blue.

44. Before postage stamps, two people paid-for letters to travel in two countries.

 C D
32. It took eight years to complete the Erie Canal, the 365-miles waterway which connects Albany and Buffalo in New York State.
 A B C
 D

III. READING

A. Read the passage carefully, then choose the correct answers.

The last two decades have seen enormous changes in the way people's lives are affected by IT. Twenty years ago, few people had access to a computer whilst today most people use them at work, home or school and use of e-mail and the Internet is an every day event.

These developments have brought many benefits to our lives. E-mail makes communication much easier and more immediate. This has numerous benefits for business, commerce, and education. The World Wide Web means that information on every conceivable subject is now available to us. Clearly, for many people this has made life much easier and more convenient.

However, not all the effects of the new technology have been beneficial. Many people feel that the widespread use of e-mail is destroying traditional forms of communication such as letter writing, telephone and face-to-face conversation. In addition, the huge size of the Web means it is almost impossible to control and regulate. This has led to many concerns regarding children accessing unsuitable websites. In conclusion, developments in IT have brought many benefits, yet I believe developments relating to new technology in the future are likely to produce many negative effects that will need to be addressed very carefully.

33. In the last twenty years
 A. there have been dramatic changes in the field of computer science
 B. people's lives have been changed a lot because of the invention of the computer.
 C. the World Wide Web and e-mail communication have affected modern life.
